

Add a Document Placeholder

Most of your document placeholders will be added to your file based on the template selected to create the file. However, you can manually add document placeholders as needed.

Note: A red asterisk (*) indicates a required field must be completed to continue.

Steps

1. With the file open, click **Documents**. The **Documents** page displays.
2. From the menu bar, click **Add**. Additional fields display.
3. Under **New Document Placeholder Entry**, complete these fields:

New Document Placeholder Entry

Folder: *

Document Placeholder: *

Import Code:

Add Before *

After

- **Folder ***—Determine which folder you want to place the document in using the selection list.
- **Document Placeholder ***—Type the name of the document placeholder. This may or may not be the actual document name.
- **Add Before or After ***—Select where the new document or folder should appear on the Documents page.
- **Linked Task to complete when document is**— You can link a placeholder to a task so that the task is automatically completed when a document is Attached to the placeholder or when the placeholder is **Completed**. To link a task, use the selection list provided. To remove a link, select **<Select a Task>** option from the selection list, rather than an actual task.

Linked Task to complete when document is:

Attached:

Completed:

- **Auto-Complete when a document is attached or transferred to this placeholder**—By default, this check box is selected and the placeholder will be automatically completed when a document is attached or transferred to it.
